

Nerium oleander

Common name:

Oleander, Rose Bay, Rose Laurel,

Palatability to Livestock:

Not known to be eaten.

Toxicity to Goats:

High risk.

Toxicity to Other Species:

Toxic to all livestock species, poultry and humans.

Poisonous Principle:

Cardenolide cardiac glycosides.

Found in all parts of the plant, especially the flowers.

Effects:

Signs and symptoms;

- . Sweating, and loss of appetite,
- . Colic, diarrhoea,
- . Dilation of the pupils,
- . Irregular heart beat, fast or slow,
- . Vomiting, convulsions, muscle tremors,
- . Irregular respiration, breathing difficulty.

Health and Production Problems;

- . Affects the autonomic and central nervous system, myocardium and gastro-intestinal tract.
- . Death from heart or respiratory problems.

Treatment;

See Vet or Doctor.

Integrated Control Strategy:

- . Garden plant or escapee.
- . Dispose of cuttings carefully.
- . Do not burn! Fumes are toxic.
- . Grub out all of the root, or use weed mat.
- . Cut stump, with Glyphosate or Tordon®

Comments:

- . Be aware, even the smoke is toxic.
- . In humans, vomiting, diarrhoea, dizziness, dilated pupils, heart irregularities, death from heart failure and respiratory paralysis.
- . Not recommended for “herbal teas”.
- . Exudes a thick white sap when damaged, which burns the mucous membranes of mouth and intestines.
- . Evergreen, thick leafy shrub, with glossy dark green leaves, growing 6 metres or more; most plants are pruned.
- . Strikes from cuttings and seeds.
- . Elongated pods, seeds with silky hairs.
- . Pink, red, or white flowers, with five petals, in clusters at end of branches, spring to autumn.
- . All stages of growth are toxic to birds.
- . Food plant for Australian Crow Butterfly; the butterfly is black and white, larvae orange black and grey.
